**Subject:** NO FAST-TRACK HARRIS QUARRYEXPANSION OR NEW ASPHALT PLANT

Dear Members of the Board,

It has come to my attention (perhaps appropriately) on Fathers' Day, that Northern Aggregates is once again seeking to circumvent the 'system' by enlisting the Board to 'fast-track' the Harris Quarry expansion- including a new asphalt plant. The folks in Mendocino County have been making their feelings known for over a dozen years on this subject: In a word, **NO**.

We are asking you to **DENY** the " Original jurisdiction of land use application because this is **NOT** an urgent / emergency situation which is neither appropriate nor necessary use of County Code 2.54.010

We have been waging this battle through public testimony, endless meetings, newspaper articles and extended litigation for a decade (plus)

We thought the message was clear; and are once again asking you to be an advocate for the *people* of this County- not for business interests which have been proven to be selfish, self serving and contrary to the welfare of the County and, indeed which violate your own Mission Statement regarding **Public Safety, Health, Social, Cultural, Education, Transportation, Economic and Environmental Needs**.

In the spirit of your own **Principles of Office** : We ask that you encourage citizen involvement in regulatory and policy development and to consider the perspectives of others as issues are discussed.

Respectfully.

Jack Magne'  
Mendocino County
