Mendocino County

“To conserve, protect, and restore wild and working landscapes to enhance the health of water, soil, and forests of Mendocino County”

MCRCD's Four Focus Areas **Combat Climate Change**

Water: Projects to mitigate impacts of drought.

Soil: Provide Funding and Technical Assistance to Agricultural Producers.

Forest: Projects to promote forest health and fire resiliency.

Land Stewardship: Manage mitigation lands to protect native plants, enhance native habitats and support local grazing.

INFO AT MCRCD.ORG

A collaborative effort by project partners and the Navarro River watershed community to promote natural stream flow, enhance native fish habitat, and support water supply resiliency for residents.

Supporting MCRCDD is Economic Development

In FY 21-22, MCRCDD brought \$9 Million into our County from State and Federal Agencies. This money paid local businesses and workers to help local landowners fight drought, enrich soil, protect forests and bring state of the art methodologies to our County.

Support to MCRCDD = 20,000% Return on investment (ROI) in FY 21/22
