

Dear Board of Supervisors,

I SUPPORT the proposed changes to the personal medical and personal adult use requirements.

I hope our Board of Supervisors respect the will of the voters and align with the state of California to have 6 cannabis plants on personal growth per person. It is a discrimination to go against poor folks who need to grow their medicine. As we are living in a broken health care system, It benefits people who have chronic pain and use cannabis to ease their pain. Not to mention our country has been damaged by legal painkiller (opioid) abuse with huge hidden cost. We should be allowed to have six plants as the state allows us to reduce our medical costs. I am really hopeful to see new faces on the board and moving away from the xenophobic position it had taken on cannabis in the past.

Furthermore, commercial activity needs to be separated from personal use. Please refer to the CCAG memo.

With regards,
Jessica Harness
