

Hello BOS,

I second Gene's concerns below. I am a Primary Care Physician in Fort Bragg and native to this part of the Mendocino coast. Ongoing recreational access to local trails (especially those close to access roads like Fern Creek, 409 and 408/Little Lake in Jackson Demonstration State Forest) is a key component to the physical and mental health of our community.

Logging, if it is felt to be a mandatory part of Forest management, should be done with consideration for ongoing local use.

Sincerely,
Zoé Berna MD
