

Wide spread testing would determine who is infected.. they can then be isolated and treated.. those who are not infected could go back to work. So far there hasn't been enough testing to even trust the numbers. The longer testing isn't available the longer this is going to take.

Thank you for all that you do and for keeping us all safe

Marlene Placido

I just got a message from my daughter in SF who just asked for and got an appointment for tomorrow ,apparently they set up a number of sites, then set up a website where you go on fill out a short application and they give you an appointment, for the next day .. results are expected in 1 to 3 days.
