

To the Board of Supervisors:

The problems with commercial cannabis operations in residential neighborhoods are not abated by moving the operations indoors.

Increased traffic and noise, security concerns, possibility of attracting crime, are all things that would change our peaceful neighborhood forever.

The Planning Commission and the Board recognized this when the Cannabis Combining Districts were created. The proposed use permits are an attempted end run around a sound and already established policy.

Those of us in the Deerwood neighborhood hope that you will continue to oppose commercial cannabis operations right next to our homes and families.

Thank you,

Marc Levine
