COVID-19 Behavioral Health Telehealth Funding Opportunity

Mendocino County Behavioral Health and Recovery Services

Budget Narrative

Telehealth Costs

The purpose of the project is to enhance our current telehealth options to allow for further expansion of telehealth services to individuals accessing and needing to access substance use disorders treatment services in Mendocino County. This project would provide the ability to expand our currently limited technology resources so that we are able to continue to provide services at the level we did prior to the COVID pandemic and continue social distancing to protect our clients and our staff. In the proposed budget we have allotted \$15,000 toward the purchase of 10 laptops so that all of the counselors needing to provide one-on-one or group encounters with the clients have the access and necessary equipment to provide telehealth services, as well as using \$5,800 for 3 desktop computers to use in the more isolated offices for when the staff need to remain distanced from other staff while still providing services within the offices. In addition to the laptops and desktops, \$1,200 of the funds will be used to pay for 5 Zoom Teleconference annual licenses used to facilitate groups and one-on-one sessions, which will be used by all of the staff that are working with clients via telehealth. In order to facilitate video conferenced groups and one-on-one sessions at the onsite workstations, 10 webcams will be purchased for \$1,000. To reduce the amount of interactions that staff have when performing a group or one-on-one session with an individual whose preferred language is not spoken by the counselor or that has a hearing disability, one telehealth cart along with a micro-computer and monitor with built in camera will be purchased for \$6,500 to provide video remote interpreting language services without having to physically be in the building with the client or the staff. The final telehealth enhancement these funds would be used for is to move the current electronic health record (EHR) to a cloud based server. Currently, the EHR is only accessible when on site or connecting to the County server via VPN, which limits staff access when working in the field or from home. To alleviate these issues, we are currently in talks with our EHR provider to move us from an onsite local server to a hosted cloud-based server which would be accessible from anywhere with internet access, which would increase the efficiency and availability that the staff has to access the system while working remotely. We proposed to allocate \$20,000 to cover a portion of the costs of implementation of a cloud based server.

Personal Protective Equipment

For Personal Protective Equipment, the funds will be used to purchase 10 boxes of gloves for \$200 and 15 boxes of masks for \$300 to provide protective equipment for staff that are providing direct services in individuals.
