3. Forensic Neuropathology Services:

The College of American Pathologists, National Association of Medical Examiners and American Association of Neuropathologists currently require the whole brain to be fixed in formalin for at least two weeks and comprehensively examined with specified protocols. Brain tissue is processed differently from other tissues in the human body, and only specialized tissue laboratories perform such analysis. In addition to specialized histochemical stains, we also perform specialized immunohistochemical stains that will provide answers to medico-legal questions in homicide cases, child abuse cases and elder abuse cases. The standards of practice as set by these governing agencies and associations state that the brain shall be examined in cases involving Seizure Disorder, Sudden Death in Epilepsy, Excited Delirium, Child Abuse, Elder Abuse, Physical Homicidal Assaults, Sudden Death in an Infant or Child, Intra-Operative Deaths etc. This rate is a highly discounted rate. Bennet Omalu Pathology charges a fee of \$7,500 to \$15,000 for forensic neuropathology examination of cases sent to us from universities, coroners and medical examiners from across the United States. We are reducing this rate by 60-80% for Mendocino County because of the contractual relationship we share.

- b. Brain tissue histology \$ 350 per case

4. Specialized Tissue and Body Fluid Testing and Laboratory Analysis:

Each test including mutational analysis, biochemical analysis, microbiological analysis and toxicologic analysis shall be billed directly for only the laboratory fee charged by the laboratories without any additional fee or cost from Bennet Omalu Pathology.

- a. The County shall be billed only the total laboratory fee with attached invoice from the laboratory or receipt of payment to the laboratory, without any additional fee from Bennet Omalu Pathology.
- b. The per unit cost of these tests are not available and cannot be determined. There are many laboratories across the United States that we use for our services, and there are tens of thousands of unique tests and algorithms than can be performed. It is not reasonably feasible to list all these possible tests performed by different laboratories across the United States. Most of the tests cost from several tens of dollars to several hundreds of dollars. Very few tests may cost one thousand or more, but no test has ever cost more than \$2,500. The most expensive types of tests are rarely, if ever performed, maybe once in five to ten years. For example, a comprehensive test panel for elements and metals and a full genome analysis will each cost about \$2,000 to \$2,500.

5. Specialized Tissue Reagents and Chemicals:

These are all types of specialized tissue reagents and chemicals that are not used routinely for example Osmium Tetroxide and Potassium Dichromate. These types of chemicals are rarely used and may never be used or used once or twice in 5-10 years.

- a. The County shall be billed the total purchase price with attached invoice or receipt of purchase.

These are all types of supplies for performing autopsies, handling and processing tissue and body fluid samples for example specimen tubes and DNA cards.
