

The city of Fort Bragg water supply dropped dramatically this past week due to this dam at Camp Noyo. The second picture is of the water level just west of the North Fork And South Fork , Noyo river confluence. Yesterday, July 12, at 5pm Third picture is google earth view of dam. As a resident with wells around me collapsed or dry and less than 2 ft in my well, water deliveries, that Fort Bragg has said will stop are a mater of life. Thank you for discussing this urgent matter.
