

Good Morning: I live in Round Valley/Covelo. Our valley is being trashed by soooo many grows. I have lived here my whole life and I am very concerned about the proposed increase of non-native land owners increasing their acreage for growing more marijuana. I'm concerned about our valleys water table. We are in a drought and as we know we have a higher fire danger in Mendocino County. Currently my home is surrounded on all sides by grows and now I notice that my water pressure is dropping. I have livestock as well that needs a lot of water. I want to express my concern and do not agree with increasing the acreage. Thank you Marilyn Horne
