Mendocino County Board of Supervisors
Sonoma Clean Power Joint Powers Authority Invitation
August 1, 2016

At the July 26, 2016 meeting of the Point Arena City Council, I was authorized to sign a letter indicating our support for the Board of Supervisors formally declaring its interest in joining the Sonoma Clean Power Joint Powers Authority.

Sonoma Clean Power has five goals. They are:

1. To seek to reduce the greenhouse gas emissions associated with electricity used by its customers.
2. To seek to increase the use of renewable energy resources.
3. To benefit the area's local economy through investment in local infrastructure, projects and energy programs.
4. To manage a diverse resource portfolio to increase control over energy costs and maintain competitive and stable electric rates.
5. To help customers reduce energy costs through investment in and administration of enhanced customer energy efficiency, distributed generation, and other demand reducing programs.

The potential to bring these benefits to the ratepayers of Point Arena is very attractive but cannot occur unless the Board of Supervisors takes action on August 2. It is our understanding that delay at this point will push the program back at least one year.

The popularity of Community Choice Aggregation (CCA) is growing rapidly in California with estimates that within the next five years, 50 percent of California counties will be served by alternative energy agencies—local agencies formed to provide electricity to homes and businesses at better rates and with more renewable energy options than PG&E. In our region, both Sonoma Clean Power and Marin Clean Energy have clearly demonstrated the viability of this new model. It's time to offer this model to ratepayers in Mendocino County.

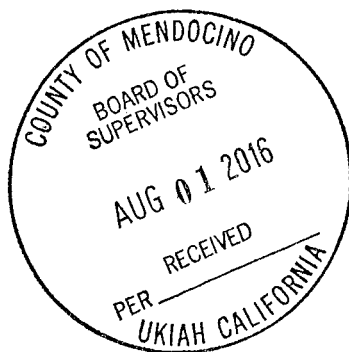

Sincerely,

Jim Koogle
Mayor, City of Point Arena

MESSAGE:

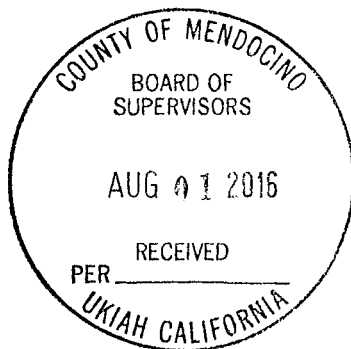

I support the Board of Supervisor's acceptance of Sonoma Clean Power's offer to service Mendocino County. I want a Community Choice Aggregation option and a clean energy alternative to PG&E that offers environmentally friendly power, generated by renewable sources, like solar, wind and geothermal, at competitive rates.

In the past, we've only had one electricity provider. SCP offers a choice of providers and creates a competitive marketplace that encourages innovation. SCP's mix of renewable energy sources will reduce the amount of greenhouse gas emissions associated with electricity use in Mendocino County.

Sonoma Clean Power (SCP) is a not-for-profit "agency." As a non-profit agency, SCP will invest locally to support Mendocino County renewable power, local jobs, and to get the most affordable sources of clean power.

Regards,
Susan E. Moon and Adam I. Brown

Subject: I've been happy to re... from Web

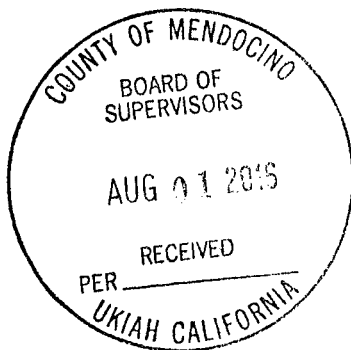

I've been happy to read that Mendocino County is considering a Community Choice Aggregation option that would allow an alternative to PG&E that would provide more green energy generated by renewable sources.

Friends in Sonoma County are very happy with Sonoma Clean Power, especially those who have solar panels as we do. Not only are they using a higher mix of renewable energy sources than PG& E to reduce carbon emissions, but their rates have been lower as well.

I encourage you to accept of Sonoma Clean Power's offer to service Mendocino County rather than trying to create your own alternative. As a non-profit agency, SCP will invest locally to support Mendocino County renewable power, local jobs, and to get the most affordable sources of clean power.

Sincerely,
Mary Sue Ittner

Mendocino Board of Supervisors;

I support the Board of Supervisor's acceptance of Sonoma Clean Power's offer to service Mendocino County. I have solar panels on my house and am pleased with PGE's rates and service and support any solar thermal or wind power plant that PGE may develop. I support the acceptance of SCP's offer because the adoption of the offer might make it possible for local wind farms to develop, which I think is a good idea, given the wind patterns of our coastal areas. Maybe the SCP can also help get solar panels on every applicable rooftop in Mendocino Count by providing local funding.
