USACE received a debris/removal management mission from FEMA in Lake, Mendocino, Napa and Sonoma Counties. To date, **2,209.088** tons of debris have been removed. That's equal to the weight of more than two Golden Gate bridges. USACE is working with our local, state and federal partners on the largest wildfire cleanup in California history.

Debris Removal Operations

- Cal OES, FEMA, & USACE are currently working with each county to cross-reference data and APNs (Assessor's Parcel Number) and validate the status of every parcel in the program.
- Currently, as part of our quality assurance process we are working parcels that are in the final preparation phase requiring additional debris removal as well requiring further action such as soil testing, re-scrapes, installation of erosion control, and car removal.
- The debris hotline is still operating and continues to receive questions and concerns raised by homeowners in regards to debris removal activities. We've found that most property owners have been satisfied with the work to their properties. Less than 10% of property owners within Mendocino County have called into the hotline USACE is working through the issue resolution process and evaluating whether further actions are needed.

Debris Removal Property Owner Issue Resolution Process

Issue Resolution Form

Issues reported through
Info Line or other means.
Form outlines the who,
what, when, where and
how.

Data Collection

USACE team reviews Issue
Resolution Form, Right of
Entry, Site Assessment, and
other relevant facts.

If needed, a site visit and
interviews are conducted.

Technical Review and Analysis

USACE field staff determines
whether issue was caused by
normal debris clearance
operations. Any damage will
be evaluated on a case by case
basis to determine if corrective
action is warranted.

Response and Resolution

Property owners will be
contacted by USACE
regarding how their issue will
be resolved.
