Subject: GMO issue later in day tomorrow: 1:30 pm in supes' chambers

Hi Everyone,

The discussion tomorrow about genetic engineering will begin soon after the lunch break tomorrow in the supes chambers. It would be best to be there at 1:30 pm.

Here's the original notice I sent out, with the times changed:

Genetic engineering is rearing it head in the cannabis industry—on national, international, and even local levels. We have an opportunity next week to make sure Mendocino County remains GMO-free.

Tomorrow, Tuesday, Feb. 5th at the County Administrative Office on Low Gap Rd. in Ukiah, the Board of Supervisors will consider amending the county's Cannabis Cultivation Ordinance to prohibit growing or producing of genetically engineered cannabis.

Please come at 1:30 pm to support Mendocino County's GMO-free reputation and to add your voice to that of our two new supervisors, John Haschak and Ted Williams, who are bringing this issue forward.

Call 707-459-2643 for more information.

I hope you can make it! If you can't, you can email your comments to the entire board at bos@mendocinocounty.org or click on this [link](#) to find the email address for your individual supervisor.

Kate
