Subject: no gmo's in cannabis

i cant come to your meeting tomorrow, but want you to know that one of the main attractions to my moving here in 2004 was because els cooperider's great work was known to me , even in austin! thanks els, for getting us started!
so, all there is to know from me is that i am ADAMANTLY OPPOSED TO GENETIC ENGINEERING, in any form! it is against all the laws of nature, and the harm is felt everywhere. just because we are woefully ignorant of how creation works, does not give us the right to screw with it.
creator knows best.
