Interests & Experiences

Special Expertise, Experience, or Interest in This Area?

I have been devoting a significant amount of time to the issue of idling vehicles, i.e. vehicles with engines running when the drivers are not moving their vehicles. Idling vehicles are a tragically unnecessary source of greenhouse gases. I am in the process of presenting a power point to various community organizations to get the word out that idling is unnecessary and very harmful to our air quality. I have all ready had some success with the Ukiah Unified School District Board of Trustees that after my presentation, enacted a No Idling Policy at schools at pick-up times. I find that most people are willing to examine their behavior once they understand the ramifications of their actions. There are so many ways we can easily change how we live in order to reduce carbon emissions and perhaps let go of some of our preferences for comfort. I have a strong commitment to doing what I can to stave off climate change. I have been an attorney for 30 years (no longer practicing) and presently work as a mediator, skills that enable me to listen well and work collaboratively with groups and individuals. I am also self-employed and semi-retired so have a flexible schedule and lots of motivation to contribute to this group.
