

I qualify for many services to help me get on my feet.

By "altering services", the people that are supposed to provide actual services, do not, RCS did for a brief moment. How can RCS staff and administration be OK with the fact that altering Services is crashing clients, some are dying and others left with no hope.

If I would've done any of the things to any of you that you have done to me through trying to get assistance, none of you would put up with it.

Using my Trumatic brain injury against me, is just plain cruel.

Myself and others, really need people to do their jobs in a manner that is beneficial to clients, not just themselves.
