

I am writing in support of the memo written by CCAG (Covelo Cannabis Advocacy Group).

I cannot emphasize how disappointed I am in our county supervisors for spending so much time even considering this topic at this point. If there was any doubt that it would keep your deeply invested legal cannabis farmers at risk, I would have expected that you'd have quickly postponed considering a hemp program at a minimum. I am all about democracy and seeing the bigger picture. There is nothing supportive of this consideration to the farmers who have collectively spent millions of dollars to follow your guidance to come into compliance.

Thank you for considering our input,
Elise Planty
