

Dear Board of Supervisors,

I am writing to support the memo submitted by CCAG regarding the hemp pilot program. As a licenced cultivator, I ask that the efforts of the board be used to support licenced family farms in Mendocino County, not on another program that will take staff time and energy. I also ask that the county agriculture department be directed to use their time to support licenced family farms throughout the county, rather than on speculation regarding a proposed but non-existent hemp program. Thank you for your time on this matter.

Best regards,

Alex Cummings
