

Absolutely disgraceful that this is even a consideration while Phase 1 remains a disaster. All we've heard is how there isn't time, money, workforce to adequately address the Phase 1 Cannabis program, yet you're willing to jump on the Hemp bandwagon Blind.

This is a HARD NO.

It's so wrong on so many levels.

I certainly hope you use critical thinking and table this until after you can have a solid, working plan & implement a Phase 1 pathway to annual licensing.
