Re: Sunset Extension (oppose)

Supervisors:

We oppose granting an extension to the sunset period that would allow commercial cannabis to continue for an additional two years within sunset zones. Our opposition is for the all of Mendocino County. Cannabis entrepreneurs have already had an extension so they may place their business where their type of commercial activity "fits". Hours have been devoted by the Planning Department and the Board of Supervisors to come up with rules and guidelines for these entrepreneurs and the commercial cannabis industry. In most cases smart business owners have made decisions that would ensure they would be successful. Unfortunately, others have not responded to the "hand writing on the wall" and have, instead, chosen to complain, protest perceived unfair treatment. and lobby. That we are having these discussions now, discussions that could affect sunset zones throughout the entire county, is an example of the tail wagging the dog. Please do what a majority of people within sunset zones have requested and expect. Vote no and put this behind us for once and for all. If these entrepreneurs haven't solved this problem in three years, granting another two will almost guarantee we will be having this discussion in 2021. Enough!

Respectfully,

William Carson
