Traffic Study Numbers 20-01, 02, 03: SPEED ZONE STUDIES ON BOICE LANE AND PEARL DRIVE, COUNTY ROADS 413 AND 412A, EAST OF THE INTERSECTION WITH HIGHWAY 1 (FORT BRAGG AREA).

BACKGROUND

In response to a request from the residents along Boice Lane, County Road (CR) 413, and Pearl Drive, CR 412A, Traffic Study Numbers (No.) 20-01, 02, and 03, Engineering and Traffic Studies for speed zoning, were undertaken on Boice Lane, CR 413, at mile posts (MP) 0.30 and MP 0.72, and on Pearl Drive, CR 412A, at MP 0.21, in January of 2020. The Mendocino County Board of Supervisors has not previously adopted a *prima facie* speed limit for the subject sections of road and therefore they are subject to the State's 55 miles per hour (MPH) maximum speed law: "*The maximum speed limit per California Vehicle Code 2015, section 22349. (a) Except as provided in Section 22356, no person may drive a vehicle upon a highway at a speed greater than 65 miles per hour. (b) Notwithstanding any other provision of law, no person may drive a vehicle upon a two-lane, undivided highway at a speed greater than 55 miles per hour...*" The residents seek to have the County of Mendocino Department of Transportation decrease the speed limit in conformance with the California Manual of Uniform Traffic Control Devices (CA MUTCD) requirements.

For *prima facie* speed limits to be legally enforceable on any road with a functional classification other than local road, the California Vehicle Code (CVC) requires that they must be:

1. Determined on the basis of an Engineering and Traffic Survey, (E&TS); and
2. Adopted by Ordinance; and
3. Posted

Failure to meet any one of the three of the preceding requirements will result in the creation of an unenforceable speed trap as defined by the CVC. Section 627 of the CVC further requires that an ET&S shall include consideration of the following:

1. Prevailing speeds determined by traffic engineering measurements
2. Collision records
3. Highway, traffic, and roadside conditions not readily apparent to the driver

Unless conditions not readily apparent to the driver are found to exist and are properly documented, the CA MUTCD requires that the speed limit, unless otherwise warranted, shall be established at the 5 MPH increment closest to the prevailing (85th percentile) speed.

ROAD DATA

Functional Class: Local Residential

Posted Speed Limits: None

Adjacent Land Uses: Scattered residences

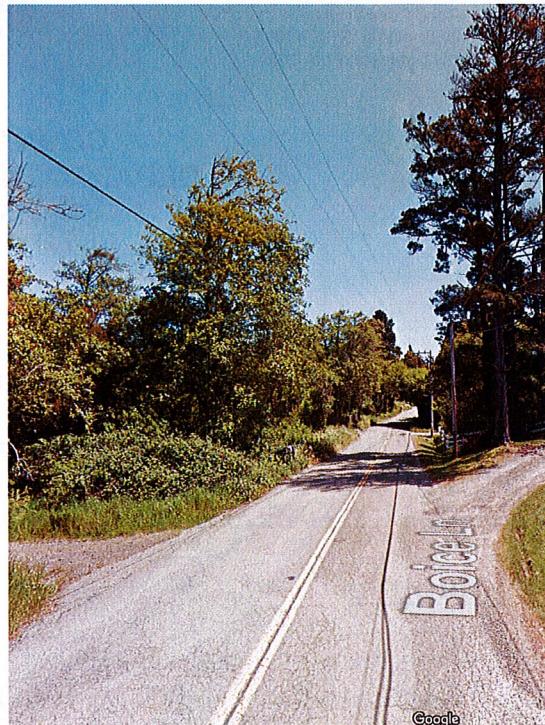

Geometry: Boice Lane, CR 413, is an divided rural roadway which runs East/West then has a 90 degree turn, after which runs North/South. Pearl Drive, CR 412A, is an East/West divided rural roadway which connects the East/West section of Boice Lane to Highway 1.

Lane Widths: 11 feet

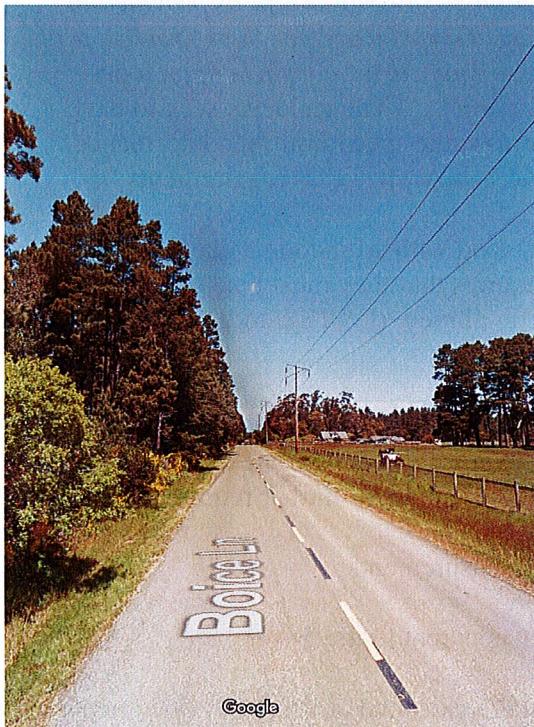

Edge lines: None

ADT-2020: 78 @ Boice Lane, MP 0.30
321 @ Boice Lane, MP 0.72
324 @ Pearl Drive, MP 0.21

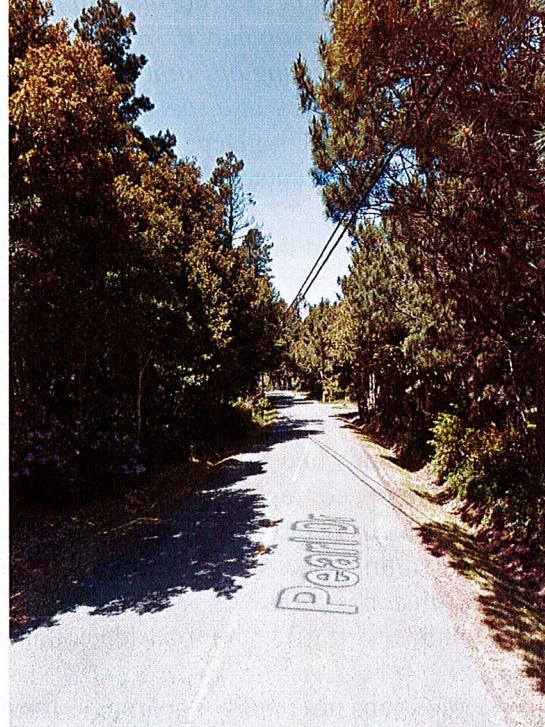

Comments: Not a residential or business district as defined by the California Vehicle Code.

Westward view on Boice Lane (MP 0.30)

Northward view on Boice Lane (MP 0.72)

Westward view on Pearl Drive (MP 0.21)

Prevailing Speed

During January 2020, radar speed surveys were performed on Boice Lane, CR 413, and Pearl Drive, CR 412A. Seven days of free-flowing traffic were encountered and measured. The results may be found below in Table 1, and the detailed survey for each stretch of road may be found in Appendix A, Exhibits A-C.

Table 1: Results of Traffic Studies 20-01, 02, and 03

Road	Direction	MP	Survey Date	Start Time	Prevailing speed (85 th Percentile)	Pace (%)	High	Low
Boice Lane	East/ West	0.30	1/7/2020	01:00 pm	38 MPH	26-35 (59.5 %)	51-55	16-20
Boice Lane	North/ South	0.72	1/7/2020	01:00 pm	43 MPH	31-40 (57.5 %)	76-999	9-18
Pearl Drive	East/ West	0.21	1/7/2020	01:00 pm	36 MPH	25-35 (65.3 %)	56-60	1-10

Collision Records

The County's database for Boice Lane, CR 413, extends back to 1999. There have been 7 accidents on this road in the past 20 years. Of the 7 accidents, 5 of them occurred on the stretch of road from MP 0.00 to MP 0.40, while 2 occurred on the second stretch of road. A detailed summary of all reported accidents on Boice Lane, CR 413, is found in Appendix B. The County's database for Pearl Drive, CR 412A, contains no accidents. There have been no accidents on this road in the recorded database.

Unapparent Conditions

On each of the stretches of road, the presence of any conditions not readily apparent to the driver would be evidenced in the collision records or in recurring damage to roadside features. There is no indication such conditions exist.

ANALYSIS

The northern end of Boice Lane, CR 413, is a straight road that is a residential area with vehicles entering and exiting residences. Just east of Highway 1, there are approximately 27 driveways encroaching on this one and quarter mile stretch of Boice Lane, CR 413. However, most of the homes are setback more than 75 feet from the roadway. The southern end of Boice Lane, CR 413, (north of Pearl Drive) is a straight road, with one intersecting local residential road and with all houses widely separated and well back from the road. There are no roadside conditions that are not readily apparent to the driver. No portion of Boice Lane qualifies as a residential district under Sections 515 and 240 of the CVC. The western end of Pearl Drive, CR 412A, connecting Boice Lane to State Highway 1, is a primary straight road, with some sweeping turns with limited visibility, with very light grades. Pearl Drive is a residential area with vehicles entering and exiting private residences. There are approximately 21 driveways encroaching on this half mile stretch of Pearl Drive, CR 412A, though most are setback more than 75 feet from the roadway.

Currently, Boice Lane, CR 413, and Pearl Drive, CR 412A, both have no posted speed limits and are therefore subject to the State's 55 MPH maximum speed law. There are no roadside conditions that are not readily apparent to the driver. No portion of these roads qualify as a residential district under

Sections 515 and 240 of the CVC. Appendix C illustrates a pictorial representation of the speed zone study area.

Mendocino County Code Sec. 15.04.040 governs speed limit changes and charges the County Road Commissioner with determining an application meritorious. Typically, the Road Commissioner's decision as to merit is based on many factors including but not limited to majority of community support (citizen petition), support of public safety agencies (California Highway Patrol – CHP), meeting the CA MUTCD and Caltrans Traffic Manual Policies and Warrants for establishing speed limits. Based on information collected on a recent radar speed survey, traffic volumes on Boice Lane, CR 413, are light, calculated to be on average 78 vehicles per day. On the southern end, traffic volumes were calculated to on average, 321 vehicles per day and rarely exceeding 20 vehicles per hour. The average traffic volume on Pearl Drive, CR 412A was found to be 324 vehicles.

A strict interpretation of CA MUTCD and Caltrans Traffic Manual Policies and Warrants for where to establish speed limits would indicate these sections of road do not merit a speed zone change. Furthermore, the initial resources (80 to 100 staff hours) needed to establish the ordinance and the ongoing requirement to keep 5 year current radar surveys on file for the court, would not be justified given the accident record, the volume of traffic and lack of aggressive drivers (very few top speeds above 55 MPH on any of the road). Nevertheless, the County Road Commissioner will supersede some normal warrants in light of practical enforcement considerations and find this Speed Zone Change application meritorious and direct that this speed zone engineering study be prepared and submitted per CVC requirements.

On the first stretch of Boice Lane, from 0.00 to 0.40, the 85th percentile speed was found to be 38 MPH in both directions; this is to be rounded to 35 MPH per the CA MUTCD to establish a valid, enforceable speed zone per the CVC requirements. According to Section 2B.13 (12a) of the CA MUTCD, "*When a speed limit is to be posted, it shall be established at the nearest 5 mph increment of the 85th percentile speed of free-flowing traffic, except... [f]or cases in which the nearest 5 mph increment of the 85th percentile speed would require a rounding up, then the speed limit may be rounded down to the nearest 5 mph increment below the 85th percentile speed, if no further reduction is used*". In this case, given the number of driveways and houses, as well as the request from the residents, it is valid to round down. On the second stretch of Boice Lane, MP 0.40 to MP 1.26, the 85th percentile speed was found to be 43 MPH in both directions. Per the CA MUTCD, this is to be rounded to 45 MPH. On Pearl Drive, from MP 0.00 to 0.56, the 85th percentile speed was found to be 36 MPH in both directions. This is to be rounded to 35 MPH per the CA MUTCD.

Drivers are influenced more by the appearance of the roadway itself and the prevailing conditions than by the posted speed limit. National research confirms what has been observed in Mendocino County, which is that lowering or raising speed limits has no predictable effect on actual travel speeds; they remain essentially unchanged. The only effect on traffic of establishing a *prima facie* speed limit is to enable patrol officers to use radar speed enforcement.

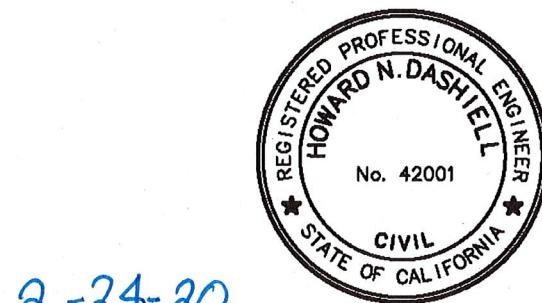

RECOMMENDATION

Under Mendocino County Code Section 15.04.040 the Road Commissioner has found this speed zone change request meritorious for these two stretches of Boice Lane, CR 413, from 0.00 to 0.40 and from 0.40 to 1.26, as well as the half mile stretch of Pearl Drive, CR 412A. Please refer to Appendix C, which demonstrates the proposed 85th percentile speed zone is valid per CVC for each portion of road.
