

Good morning,

I hope this email finds you all well. I'm glad to see we're starting surveillance testing. More data is always better as long as it represents a true picture. I'm writing to encourage you to include the coast in your testing efforts. Street Medicine continues their efforts on the coast. Seems like a good opportunity.

Why include the coast?

1-We had a Covid19 case from the south coast.

2-Highway 20 spills out into Fort Bragg. We have many visitors from other areas who tend to access places shared by our unsheltered, eg Starbucks, Taco Bell, McDonalds, public restrooms.

3-Some of us had a virus in February. Fever cough etc. different from anything ever experienced.

Keep up the good work. We're on the frontline together.
