

I am writing to you because, as you are aware, I am a real estate agent. I know many professions are taking a hit right now. Real estate is no exception. I have been sheltering in place as required for my profession in Mendocino county at this time. It has come to my attention though that the Federal and State guidelines now consider my business essential. My understanding is that Sonoma, Marin, and Napa counties, have all updated their SIP orders to allow Real Estate agents to show vacant homes at least. Having a home (shelter) is essential just like having food. I am hoping the board of supervisors for our county will reconsider the restrictions placed on real estate agents and allow us to move forward by showing, having inspections, etc. with transactions for vacant homes at least.

Thank you for the work you do!

Kindest regards,

Randa
