

Dear Board of Supervisors:

I just saw the video below and think everyone in Mendocino County should be aware of it. Even though many U.S. health officials have been saying that the general populace doesn't need to wear masks and using them is actually harmful because it causes a scarcity for health care workers, there is a solution to that problem, which is shown in the video. Also, there is evidence that the use of masks by as much of the general populace as possible, even the homemade ones demonstrated in the video, is one of the only ways to keep the virus from spreading at this time.

Mendocino County officials may already be familiar with this information and are planning to make it public or already have, but I am hoping perhaps it can also be added to the agenda for tomorrow's Board of Supervisors meeting. If people are still socializing despite all the warnings by county officials and everyone else, at least perhaps they would be willing to wear one of these masks, perhaps especially if it could be made into a sort of trendy form of self-expression.
