

Please do not give this person another dime of Mendocino County tax money. She can't even follow her own rules for sheltering in place, she is living in Southern California. We should not be giving her our tax money, period. There are plenty of local people who can do what she is doing, and live by their own rules. It is a joke that she doesn't have to obey the shelter in place rule, don't you think the rest of us would love to go see our families as well? If you give her a raise, you are showing you do not care about the residents of this county. Get someone in there that actually cares about the place they are making decisions about.
