

Hello all.

I do believe it is wise to crack open the door with thoughtful and enforceable solutions.

To start:

Local (walking, biking, 15 mile drive) access to headlands, beach, ocean.

Local access for fishing and surfing for mental health and well being, food!

Minimum 20 feet physical distancing. (even further if ya like)

Last week I proposed a REMOTE SIP program to Ted regarding short term rentals at Airbnb, VRBO and other private properties

Owner is responsible for the SIP compliance of all guests..

Do not travel if you have ANY SYMPTOMS -

Minimum stays of 14 days for SIP requirements. Reduced rates.

Must have own mask and gloves.

No grocery shopping, all basic items should be brought with you.

No entrance into local shops. Curbside pick-ups and delivery only

No shopping at grocery stores

When in public must wear face coverings

Extra charge for cleaning so we give high pay for hazardous work and provide protective gear.

Must carry ID and address of Lodging.

It's questionable if owners would be willing to take that risk, but It's a suggestion.

May we find good common sense solutions. Thank you for your sincere efforts!

Onward to a new day!

Sherry Glaser
