

Hello,

We are a Gymnastics facility closed due to the Covid 19 outbreak. Our programs require full physical contact with as many as 30 plus kids in the gym at one time, usually in separate groups of 7-10. I'm assuming schools and full contact sports (ie football, cheer, basketball, etc) will be the last phase to roll out for reopening.

We can mask our coaches and students but constant physical contact and rotations of touching the same equipment is unavoidable in our training. I guess what we are asking is, what is your best guess at the earliest date we may get back to business?

Thank You
