

Dear Board of Supervisors:

Here are a few talking points we would like to have input on, as professional Massage Therapists on the Mendocino Coast.

We, a large body of massage therapists; feel that it is not safe going into peoples homes. We are in much better control of sanitization protocol if we can see people in our offices. If it does get approved for outcall, we would prefer not to do outcalls, as this will/can impact our ability to receive unemployment. Also, We would like to be able to help write the safety protocols when we are able to reopen our massage studios, which are mostly small one person operations in which we have control of who and how many people enter our space.

Thank you for your consideration,

Katrina Aschenbrenner, CMT
Deep Roots Healing Arts

Representing Mendocino Coast Massage Therapists Group
