

To whom this may concern. I have lived in Mendocino for over 40 years. We have been residents of redwood valley for over 30 years. We love it here. But to watch what is happening now is heartbreaking. We have been through so much here but we keep on!! We know the virus can be bad. But we need to take steps to get Things moving in Mendocino county again!! Our small businesses are suffering! People are suffering! I believe the people of this county know how to be safe and know how to act and how to appropriately take the safeguards that we need in this environment. But now We need to get this county up and moving again! What can we do to do that? Please help us figure out how to get our county going again! Please! Thank you for listening, Kirsten Ingram
