

Hello All;

The Senator and Wood's press release of the 12th regarding testing is meaningless political CYA garbage.

The fact of the matter is that none of you, or the PHO, had the foresight or imagination to arrange for this testing 2 months ago and have failed to produce results that will allow tourism in Mendocino this year.

I am 70 and cannot get N95 masks, so the Sea Glass Museum will not open until there is a vaccine. I can weather that.

However, your lack of foresight and incompetence in getting us the testing we need is going to devastate this county.

Everyone will blame YOU and the PHO for your lack of foresight and effective action and I think you, too, should be looking for other jobs.

No way ANY of you will be re-elected. You will be lucky to avoid a tar and feathering and a split rail ride out of the county.

Shame on you all.

Cass

One of you should tell the Senator if he gives a damn about feedback he should empty his email inbox, which is full and won't accept more emails.

Wood should also have a regular email address, not the 200 character form on his website.

Other signs about how much you folks really care.
