

To whom it may concern. Please consider opening up camping in Mendocino County. I feel you can easily camp while remaining socially distant and when you can't face masks will work!. I think what this state needs to heal is to get back out in nature! Most camping has opened out here surrounding where I live. They have opened with no more than 8 per site and when they can't socially distance themselves they wear face masks and it has been working wonderfully. Please consider reopening Mendocino County for all camping and not just for people that live within the county. We miss Mendocino and would help not just my mental well being but for hundreds for who are patiently waiting to come stay the night on the most beautiful coast.
