

Just for the record as a 1/2 brown person (mostly indigenous of South America), a coast constituent and democrat I think that our county's Sheriff, the city of Fort Bragg's Police dept and our coastal CHP are all currently doing an excellent job with transparency and racial equality/ fairness. The Sheriff especially has done a great job in creating community trust through their policies, procedures and overall practices. My assumption is that even though this is about creating a citizen oversight committee it would still mean the use of to much desperately needed resources allocated to law enforcement. (?)

Although I don't live in Fort Bragg I do think that resident Robert Bragg is right on about changing the name of the city because of the horrible history his ancestor caused and who the town is named after. BUT the cost to local gov and businesses is not worth trying to do this now with so much financial hardship happening. Maybe there can be a another way to address this issue while bypassing "formal" change for the time being?

Thank you all for being co creators of this lovely county that I feel so fortunate to be a part of.

Sincerely,

Francesca Ciancutti
