

Hello . I don't support the adoption of the non lethal method of predator control . It may work fine for a few people but certainly is not feasible for those of us with multiple leases and thousands of acres & hundreds of cattle . We employ livestock protection dogs at home with sheep goats and cattle but it's not feasible away from home . We have won this battle in the past and we expect you to support our needs and wishes on this subject again. It's not like we just Willy nilly kill every predator that we see but we need the right to dispose as necessary and also employ the services of our government trapper when needed . The care of the livestock is our moral and ethical obligation as well as our financial need in order to continue feeding the people . Please listen to us the silent majority rather than the few vocal extremists. Thank you
Deborah Bauer , cattle , goats and sheep in the Round Valley area of Mendocino County.
