

Mendo County Supes....We very much need trappers to do their work on the coast. They have always been helpful in the past & it is pretty scary at times to have a lion on my roof or in the forest out my bedroom window. We all want our critters & our children safe from attack. Just not acceptable to not get help from our trained government employees & contractors. Please allow us to keep this valuable resource to use when needed.

Thank You for your service...
