Hi Bill,

I just want to make sure what I've been putting energy into, is what you will want to see. I'll keep it short, but if I could lay out the graph paper for your review, it would give me a lot of guidance that I'm moving in the right direction. I'm staying the night on the 5th, and heading back on the sixth. I would love to stop by on either the afternoon of the 5th, or sometime on the 6th, whichever is most convenient for you.

Please let me know!

Collin

Hi Bill,

I've been moving along on the project. I've drawn up the piece of the property I'd like to change (the tower) from all four angles, as well as drawn an image of the proposed change from the street view to include surrounding structures. I also amended the application to reflect the key points I got from our last meeting.

I've got the layout of the buildings with the proposed change to draw (birds-eye view) and then I think I'll have a package worthy of delivering to you. What address should I mail it to when it's ready? I'm expecting to get this in the mail this week.

Can I get into your schedule for Monday, March 5th? I'll be bringing the family to town, and I'm hoping to meet with you while they play at the beach. It would be great to get your feedback about the ideas, and make any changes you would like.

Hopefully what I've drawn up will look good, and I can get a spot in April's Historical Review Board meeting. If not, then I'll know what to work on to go from that point.

Thanks,

Collin
