

Megan, Trent: Thank you for the productive discussion today.

John: Trent, Megan and I identified action items during a call today, and we decided it would be best to address those items first, so we can make further progress at a future meeting. We expect to schedule a conference call around mid-July to discuss next steps and will include you in the coordination.

The action items we will be addressing in the meantime are:

(County) Provide strategic prioritized list of county permits for CDFW sensitive species review;(County) Modify the draft project review policy for use during a proposed “pilot” period;(County) Create checklist for County sensitive species review during pilot program; and(CDFW) Provide draft of improved format for sensitive species review comments that will align better with County ordinance requirements.

Colleagues, feel free to clarify any of the above.

Thank you,

Angela
