

I would like to speak to the importance of keeping this in place and making it stronger, making it work. We have only lived in this area 3 years now and have watched the news and heard updates on PBS but it seems to not ever get beyond frustration at the slowness of the process and lack of progress, generally. There seems to be so much potential for growth for this area, in improved economy. And we need it to protect this beautiful environment. It sounds like enforcement of those protections for the environment and the legal growers is lacking and needs help.

Thank you for your time.

Sincerely,

Maggie Robinson
