

Mendocino Pomo Land is already being ravaged by corporate clear cutting of Forest. The people voted to stop the most egregious methods of tree killing, yet the Fisher family continues to skip off with billions in profit while the erosion, fire and chemical effects continue to be our County's harmful legacy.

Protect us from corporate Cannabis using scarce water and precious range land. Small farmers spend in County, corporations drain natural resources from the already stressed land to fill far off pockets.

The wildlife slaughtering decision goes against scientific and natural reality. Please reconsider.
