

Dear Board of Supervisors,

Please support this ordinance! Many of us who live in wooded areas -- and there are so very many of us in the county living in such condition, even those in our rural towns -- will benefit from having abandoned or neglected properties cleaned up.

Many of us have gone to great work and expense (as I have) to get our own properties more fire-safe, yet we must continue to live in fear if our neighbors have not done the very basics to prevent a fire from raging on their properties (as opposed to blowing through when we have cleaned up hazardous vegetation).

Please pass this ordinance.

Many thanks,

Kim Bancroft
