

As a long time (9.31)farmer I expect more from the County in making sure our permits are able to become State Annuals. This has been a complete disaster from the beginning. You looked a gift horse in the mouth and decided you knew better. Look now, we are essential, you need income and could have had a very large coffer had you done this right. It's your last chance but now you have to save the county from its complete demise. Do the right thing or it will be a worse disaster than you could ever imagine. We farmers have jumped through every hoop you've thrown at us to the tune of THOUSANDS. We pay your salaries, no cannabis farms no jobs, etc.

M Womack
