

I hope you realize the important information you are getting from MCA, and follow it. Time to finally do the right thing and get Mendocino County on the map. That is what needs to be done, MCA is showing you the way, don't blow it again.

These guys know what needs to be done, they have first hand knowledge on how things need to go. We have waited for you to do the right thing and paid dearly to the point that is obscene. You can only imagine what can happen if you don't straighten this debacle out, not to mention you will all be out of jobs, this entire county will crumble. What an opportunity you blew once, let's not be the laughing stalk of the country. We should be the leaders

We have almost gone broke following what has been demanded of us, don't think we will go away quietly.

Stop making excuses and make the solution. NOW

Ted Liese
