

We would like to state that we concur with MCA's and others requests stated below:

- 1) A new Ad Hoc to address CDFA and CDFW compliance for Phase 1 and Phase 2 current permittees. The Ad Hoc must be comprised of Supervisors whose tenure will extend beyond January 2021.
- 2) Singular staff focus on and protection of current permittees over the development of any new local land use permit based cultivation regulations.
- 3) Support and endorsement of the MCA memo.

We thank you once again for working towards some resolution for all of us within this industry, that have been doing our best to meet the demands of the many different agencies. We hope that we're not left out to dry and that this road does not become any more difficult.
