

I am the owner operator of Skin Care By Wendy in Fort Bragg, CA. I have been practicing as the sole proprietor of my practice doing massage and facials for more than 27 years in the same location. I have been shut down from working in my studio performing facials on my select, local clientele. I do not accept any new clients off the street. All of my clients have been sheltered in place for months, and are clearly free of Covid-19. I am practicing the Covid precautions in my studio with full sanitation and distancing between each individual client. My clients would like to have my services performed in my safe space and do not like the fact that we have been unjustly restricted from this. I request that you strongly consider reopening this sector of our local business for the health and well being by way of our personal services. You opened us up in July for a couple of weeks and then shut us down again. We need to get back to work. Thank you for your consideration in this matter.

Thank you,  
Wendy Daniels
