

Hello,

My name is Tiffany. Although I am not a cosmetologist, aesthetician, or manicurist I do use these services on a weekly basis. Not only do I utilize them for cosmetic reasons I also do so because it is a wonderful way to destress, unwind and level out my mental health. I am not only upset that my access to these places has been removed but I am also so outraged for the operators/owners of these establishments!

This shut down has caused so much stress, anxiety and financial stress its unreal! Many of these people make their living thru their salons, support their families and now have been put into serious debt due to this absolutely uncalled for closure! California is the ONLY state that has kept their Salons closed, WHY?! Barbers, Cosmologists, Aestheticians and Manicurists are trained by the state, let me repeat that, these individuals are basically sworn to uphold the most sanitized facilities amongst all businesses and yet they are being forced shut for an unanswered reason.

Here we are allowing box stores such as Walmart, Target, Ross, Kohls ect remain open while everyone and their sisters brothers cousin touches, coughs, sneezes on the items that no one is going to sanitize or ensure is COVID-19 free yet highly sanitized monitored facilities whom are truly capable of controlling the amount of customers they see in a day are forced to stay closed and better yet are being punished with fines and now threatened that they will be stripped of the license THEY paid for if they perform their jobs! What kind of garbage is this!? Rumor has it they're being told now in order to work outside their homes/buildings they will need to purchase a permit??? FOR WHAT!?

Open our salons back up. Quit forcing small businesses to close their doors for good or fall so deep into debt they have to file for bankruptcy! This is uncalled for, no other state is doing this to its small businesses and there is no reason to. #openoursalons

Thank you for taking the time to read this and listening to those of us fighting for whats right!

Sincerely,

Tiffany McPherson
