

Hello,

I am appalled by the lack of action regarding the individual disaster relief in Mendocino county. The people deserve answers as to why other counties have the ability to ask for fema assistance and Mendocino county is not included. The fires started August 17 and evacuation orders have been in effect since then. I have been unable to return to my residence as the roads have been closed. The hotels in the area have been extremely expensive and selling out quickly. Without disaster relief from the federal government the people of the area including myself will not be able to survive. I need to know as soon as possible when the individual disaster relief will be requested from the US government.

Thank you
Chantel
