

10/13/20

Dear Supervisors,

As a resident of Mendocino County for over 50 years I have seen the conversation take many turns when it comes to cannabis. There has always been a struggle in respect to how to enforce the laws, how to respect the fact that cannabis has medicinal properties, how to accept differing cultures into the community, and how to write regulation.

You now have that opportunity to stick with what is right and fix what is not. As a person who has grown cannabis in Mendocino County for over 25 years, I am proud to be a member of MCA and proud to strongly support MCA's recommendations for Agenda item 3a on the 10/13/20 BOS agenda.
