

Good morning, I would like to know if any of our Board of supervisors attended this meeting. As a mother of two children, not in physical school, the response of this county with our numbers, I feel as though there is not an urgency. Not an urgent push to get schools open and challenge the state for these totally arbitrary tiers! The fact that our hospitals have NEVER had an issue, and the survival rate is what it is, I cannot sit idle and continue to see the damage to not just my girls, but all of these kids. The damage to our counties economy is terrible, and is devastating. We are business owners, and while we are fine, their are a lot who are not. Please think for our county independently, and reach out if you have not already to other rural counties and open our county fully. Thank you for your time,

Delicia Seever

Looking forwarding to finding common ground tomorrow with my North State legislative colleagues and County Supervisors from 15 counties. We are stronger together.

***Meet Regarding Rural
County Response to
COVID-19***

North State legislators are hosting a conference of Northern California County Supervisors to discuss and find common ground on a variety of COVID-19 related topics including: the re-opening of the economy and civic life, the re-opening of schools, and actions in response to the State of California's threat to withhold entitled county funds. A sample of the invitation sent to County Supervisors is attached.
