Re: Re-zoning request to create a Cannabis Accommodation District

To whom it may concern:

We oppose this re-zoning request to create a Cannabis Accommodation District.

Living in this residential area, we have noticed more and more people driving on our private road and engaging in cannabis activities that we don't think are legal. During the cultivation season, there are countless cars going up and down our road. These people do not live here and shouldn't be trespassing onto our private road. We have noticed increased litter on this

private road as well. We have also noticed the noxious smells of marijuana growing on peoples' properties nearby.

We do not want to see an increase of cannabis cultivation in this residential area for reasons of public safety, noxious smells, increased water usage, increased mismanagement of land, and increased traffic.

Without active enforcement in place for the growing of cannabis, the only hope of stopping this disregard for our natural environment and neighborhood is to file a complaint with the planning department. We do not feel safe doing this. We fear repercussions from our neighbors and/or their associates if we do so.

This trend of more and more cannabis cultivation sites in our county is very disturbing.

Please do not approve of this re-zoning request.

Thank you for your consideration of this matter.

Sincerely, Denise Doering and Robert Hudson
