

My name is Kay Testa, and our family has lived here, in Calpella, for 108 years. on the same property .We are very proud of our heritage and hope to pass our land to the 6th generation. Cannabis is nothing but trouble. Killings, robberies steeling and worse. We don't need these new changes and especially re zoning. I have a dirty, nasty Pellet mill across the street from me that I did not know was coming. Its polluting and dirty and now that it's there, there is nothing I can do! Cannabis should not be grown in populated areas, where people live and are raising their family. It's hard enough these days to raise children, teach them right from wrong, and have a grow next door. I have property in Lassen County, it would be a great place to grow. Please leave us alone and take your cannabis somewhere else.

The Testa family
