

I live in Redwood Valley. Your constant hassle over a simple agricultural product is a drag. Why are you acting in such a childish manner? Just grow up and stop hassling people. Does it give you a sense of power to hassle folks? I am hoping the new board will be more grown up.

I am writing in support of CASE#: R\_2019-0009 to allow the properties to be rezoned for commercial cannabis. After the devastating Mendo Complex fire blazed through this neighborhood these families could use the extra income for legal cannabis to help compensate for some of those losses. We need to encourage small farms like this that are willing to enter the legal program. Farms like these will help neighborhoods and communities be able to not only survive, but hopefully prosper. By being able to enter the legal industry, these properties will be able to be inspected and held to the laws to negate any community concerns over smells, light pollution etc. Please allow these parcels to enter into the program.
